To whom it may concern,

Cyndan's "Clean n Guard" is a valuable part of all our technician's tool kit. In our workshop and out in the field our technician's carry and use Cyndan's "Clean n Guard" to clean and protect glass panels in our photocopiers. The anti static properties of "Clean n Guard" are very useful in a photocopier to keep the pages from sticking together from static electricity. With Clean n Guard's microscopic protective film it helps to repel finger prints, dirt and smudges on the glass panels which can cause unwanted marks and lines on copies. These properties are the main reasons we use Cyndan's "Clean n Guard" everyday.
