TO WHOM IT MAY CONCERN:

Recently we applied "Cyndan Micro-Inviso Shield" to a large multicoloured pavement depicting our logo on our Dry Creek premises. Seeing as this is a high traffic area we were looking for an efficient protective sealer.

After considering many sealers on the market we decided to use "Cyndan Micro-Inviso Shield" due to its unique qualities. These include: low toxicity, water proof properties, no surface discolouration, simple application and long life performance.

On application we were most impressed with its water repellent properties and the fact that it did not alter the appearance of the sealed area.

We are very happy with the results and would recommend "Cyndan Micro-Inviso Shield" to anyone in similar circumstances.

Yours faithfully

Joseph Bagnara
(Training Supervisor)
