Mr. Danny Hamilton
Cyndan Chemicals
P.O. Box 610
Mona Vale, NSW 2103

Dear Mr. Hamilton:

Biodegradability of Chemical Toilet Additive

We have investigated the ingredients of Chemical Toilet Additive to determine the biodegradability of this product. The results are discussed below.

Chemical Toilet Additive contains ingredients claimed by the suppliers to be degradable in ecosystems.

We can advise that the product may therefore be described as biodegradable, and that this claim may be readily supported.

Further details may be seen on the MSDS if necessary.

Note however that at least two of the ingredients are themselves biocides. They will therefore destroy bacteria in any environment into which the product has been released.

We hope this information suffices for your purposes.

Yours faithfully,

John Kilford
