CYNDAN\* CITRUS OIL FORMULATION is a natural citrus based solvent which emulsifies and dissolves a range of greases, oils and waxes. It has a multi functional product for use in the automotive, food processing, hospitality, sewerage and waste management industries. This product can effectively be used on heavy grease deposits in grease traps, to soap scum in showers, to the dissolving of chewing gum and adhesives.

## DIRECTIONS:

CYNDAN\* CITRUS OIL FORMULATION can be applied to any surface by mop or spray. Use agitation where necessary then rinse. For grease trap applications: pour CYNDAN\* CITRUS OIL FORMULATION into the grease trap or down clogged drains, allow 20 to 30 minutes contact time and flush the line through with water, preferably hot. To prevent further problems a maintenance dose should be used down each drain leading to the grease trap. The amount will vary on the application and outflow of the drains. Please consult with your CYNDAN\* Distributor to determine maintenance dosages and to see our range of automated dispensing equipment to regulate the dose.

Some graffiti problems can be solved with CYNDAN\* CITRUS OIL FORMULATION. Please ask your CYNDAN\* Distributor for a demonstration.

**SAFETY:** Avoid contact with eyes.

**FIRST AID:** If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
