CONCRETE WASH

25% HYDROCHLORIC ACID
CONCRETE AND MASONRY CLEANER

UN 1760	HAZCHEM CODE	2X	PACKAGING GROUP	II
---------	--------------	----	-----------------	----

CYNDAN* CONCRETE WASH safely removes mildew, rust stains, mineral deposits, grease and dirt from all masonry surfaces.

DIRECTIONS:

Ffloors should be cleaned first with a solvent degreaser such as Cyndan Dislodge to remove the heavy grease deposits from the surface. 1 part Cyndan Concrete Wash should be diluted with 6 parts of water and applied to the concrete, agitated and rinsed off. Cleaning with Cyndan Concrete Wash will remove the stains on the concrete where the Cyndan Dislodge only removes the grease from the surface. Dilution of 1 to 6 can be used to remove mildew and rust stains from bricks, concrete, terrazzo, pool surrounds, filters, tiles, etc. Allow the Cyndan Concrete Wash to sit and draw out the stain. While rinsing off agitate to remove stains from crevices. Testing of tiles prior to the full application is advised as some glazes may be damaged.

SAFETY: Corrosive. Avoid contact with eyes and skin. Wear protective clothing, gloves and eye protection.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes. If skin contact occurs, remove contaminated clothing and rinse for 15 minutes with soap and water. Ensure clothing is washed thoroughly before using again.
