

CAUTION Keep out of reach of children
Read safety directions before opening

CYNDAZYMES

Cyndan Cyndazymes are a natural biological treatment which are safe and harmless to piping materials, humans, animals and the environment. Ideal for grease and odour control.

DIRECTIONS:

General plumbing - if blocked, clean or pump out the area prior to commencement.

Treatment is best carried out at the end of a days operation.

Toilet bowls - septic, initially add 500gm per 2500 litres of tank capacity via toilet bowl. Maintain with 30gm per week.

Sewer - add 10gm of Cyndan Cyndazymes per bowl per week.

Grease traps - initially add 100gm of Cyndan Cyndazymes per 400 litres of capacity.

Add to warm water, soak for 30 minutes. Apply solution to grease trap directly or via sinks. 20gm per 400 litres weekly.

Drains, urinals - add 10gm to one glass of warm water. Let stand for 30 minutes.

Pour solution down area monthly/as required.

Note: To obtain the approximate capacity of a holding area, multiply length x width x depth x 1000 = litres (in metres).

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
