

# DISLODGE

Degreasing additive

Increases flashpoint  
of most solvents  
making them safer

Non Flammable

No Caustics or acids

Safe to use

## High Flash Point degreasing additive

**Cyndan Dislodge** is a degreaser additive. It is a concentrate which is designed to be added to present degreasing fluids. It contains no caustics, acids or creosote materials making dislodge safe to the skin and low in odour. Dislodge is not classed as a flammable liquid as it has a high flash point greater than 61°C.

When added, dislodge:

1. Increases the flashpoint of most solvents, thus increasing it's safety.
2. Chemically changes the make up of present solvents making them emulsify in water, thus improving rinsing and cleaning.
3. Increases the penetration of current solvents which results in a more thorough cleansing and a surface free of oily residues.

**Safety:** Dislodge creates a new level of safety when working with hot machinery. As an additive, Cyndan Dislodge can be added to any hydrocarbon solvent such as kerosene. When blended with other solvents Dislodge forms an economical solution for all degreasing applications.

Use for:

- ✓ Safety solvent based degreasing
- ✓ Removing pre-delivery wax
- ✓ Parts washing
- ✓ Cleaning workshop floors

AQIS approved  
Category 3,  
generals cleaner  
type C
