ECONO 1601

62 g/L SODIUM HYDROXIDE

UN 1760 HAZCHEM CODE 2X PACKAGING GROUP III

LIQUID BEER LINE CLEANER

CYNDAN* ECONO 1601 is specially formulated to eliminate yeast mould, scale and other substances, which can sour the taste of beer. It rinses completely leaving no detergent residue to cause flat beer. It gives sparkling, attractive beer from every tap.

DIRECTIONS:

CYNDAN* ECONO 1601 does not require hot water mixing. In addition to daily flushing, clean once a week using the following procedure or according to brewery instructions.

1. Keep compressor running, but turn off the control valve to the particular cooler being cleaned.
 2. Connect beer lines to the water main, then clear with CO₂ (carbon dioxide) gas.
 3. Fill cleaning can with sufficient cold water to fill beer lines. Add 60ml of CYNDAN* ECONO 1601 per 5 litres of water (increase dosage to 100ml if beer lines have been neglected for some time). Swirl the can, the cleaning solution, is now ready to use.
 4. Using CO₂ gas, force-cleaning solution through beer lines. To ensure that the beer lines are completely full allow detergent solution to flow freely from taps before shutting off taps. Leave for 30 minutes. Extend soak time if scaling or deposits are noticed in lines.
 5. Using CO₂ gas, force mixture out of beer lines and fan taps. Connect lines to water system and flush out all traces of detergent.
 6. The beer lines are now scrupulously clean ensuring lively, good tasting beer.
- Regularly dismantle taps, extractors, manifolds and transfer leads etc and soak in CYNDAN* ECONO 1601 solution. Scrub and rinse thoroughly. Store in clean and hygienic place.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
