FABRIC FIRE PROOFING

CYNDAN* FABRIC FIRE PROOFING is a water based solution for the treatment of fabric. It is intended for in-situ treatment of curtains, carpets and soft upholstery materials. Natural fibres and mixtures of natural and synthetic fibres can usually be satisfactorily treated.

Natural fabrics are generally acceptable for treatment. These include cotton, sea grass matting, velvet and carpet.

DIRECTIONS:

CYNDAN* FABRIC FIRE PROOFING is supplied as a ready to use product. Apply by airless sprayer for best results. Coverage rate depends upon fabric being treated. Normally 1 litre of solution is needed for every kg of material. As a guide 5m²/L on 140gm/m² cotton to 1m²/L on 3.2kg/m².

CYNDAN* FABRIC FIRE PROOFING is resistant to dry cleaning. After washing however retreatment is necessary. Carpets should be cleaned and retreated after 9 - 12 months. Other materials need retreating every 2 - 3 years to maintain effectiveness.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
