FRESH & CLEAN

99g/L HYDROCHLORIC ACID and 50g/L SULFAMIC ACID

UN 1760 HAZCHEM CODE 2X PACKAGING GROUP III

AGGRESSIVE PORCELAIN AND STAINLESS STEEL CLEANER

Cyndan* Fresh and Clean is expressly formulated for the removal of rust, soap scum, body fats, uric acid and other soiling. The powerful combination of hydrochloric and sulphamic acids results in a deep thorough cleansing which draws out stubborn stains eliminating odour by removing the source.

DIRECTIONS:

FOR TOILET BOWLS AND WASH BASINS: Mix a solution of 1 part Cyndan Fresh And Clean with 9 parts of water and apply to the toilet basin with a hand sprayer or mop. Allow the Cyndan Fresh And Clean to sit, then mildly agitate and flush. For thorough cleansing direct the spray under the lip of the bowl. If the stains are particularly bad a stronger solution may be used.

FOR SHOWER STALLS: For the removal of mildew and soap scum simply spray a 1 part Cyndan Fresh And Clean and 4 parts water solution onto the shower stall. Agitate and rinse.

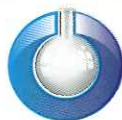

For continual maintenance use Cyndan Fresh And Clean diluted with 10 parts water. The use of the Cyndan Heavy Duty spray applicator for this application makes the job very easy. See your Cyndan representative for more details. If used on stainless steel urinals, be certain to rinse off thoroughly to avoid damage.

SAFETY: Corrosive. Avoid contact with eyes and skin. Wear protective clothing, gloves and eye protection.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes. If skin contact occurs, remove contaminated clothing and rinse for 15 minutes with soap and water. Ensure clothing is washed thoroughly before using again.
