

GRAFFITI ARMOUR

Simple pressure
washing

Excellent
resistance

Environmentally
friendly

Cyndan Graffiti Armour is a one-component, non-sacrificial, ready-to-use siloxane coating that cures with atmospheric moisture.

This unique siloxane product creates a non-stick surface that easily repels graffiti. Unlike other products, this single-component semi-gloss coating doesn't require solvent cleaning or abrasives to remove graffiti. Simple pressure washing or hand-wiping with water does the job easily and economically – at a 25 to 40 percent savings compared to existing methods of abrasive cleaning and repainting.

Unlike conventional anti-graffiti coatings that erode away after a few cleanings, Cyndan Graffiti Armour allows graffiti to be removed countless times without reapplication. Brush, roll or spray it directly to bare brick and concrete, or previously painted surfaces like steel or wood. No mixing is needed. It applies in one coat and dries quickly, with excellent adhesion properties and high resistance to chalking, fading and peeling.

FEATURES AND BENEFITS

- Excellent graffiti resistance.
- Excellent clean ability with either a cloth or white scourer, and detergent or power washing.
- High UV resistance.
- Extremely flexible.
- Excellent adhesion.
- Low VOC.
- Fast drying.
- Outstanding airless spray properties.
- Single component.
- Extremely weather-resistant.

Before

After

Protects surfaces from:

Paint

Paint sprays

Permanent markers

Ideal for graffiti-prone areas:

Transit stations

Bridges / overpasses

Rail cars

Retailing walls

Fences

Municipal buildings

Shopping plazas...
