GREEN SOLVE

A WATER SOLUBLE BIODEGRADABLE, NON TOXIC, PAINT, GREASE, INK AND CARBON REMOVER

Cyndan Green Solve can be used as a Hot (to 80deg) or Cold Tank Degreaser to remove most oils, greases, paints and carbons. Cyndan Green Solve is water soluble and needs to be stored in a vessel with a removable lid when used as a Tank Degreaser.

DIRECTIONS:

Place parts to be cleaned into Cyndan Green Solve and allow it to soak long enough to remove the grease and carbon build up. When this has been completed remove the cleaned parts from the tank and rinse with water. Cyndan Green Solve can also be used to remove unwanted paints and inks from most surfaces. For porous masonry surfaces we suggest that Cyndan Green Gel be used. (Please contact your Cyndan representative for a demonstration.) To use Cyndan Green Solve on porous surfaces spray or brush the surface with Cyndan Green Solve and allow time for maximum penetration to occur then reapply Cyndan Green Solve and wait 5 minutes then rinse the surface using a High Pressure Water Cleaner. Cyndan recommends that a test be carried out on an inconspicuous surface to assess surface compatibility. To remove unwanted paint and inks from painted surfaces, soak a cloth with Cyndan Green Solve. Whilst wearing gloves wipe the unwanted paint and ink from the painted surface taking care not to remove the paint from the pre-painted surface. Then rinse thoroughly with fresh water.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
