# HIGH SOLVE

## SAFETY DEGREASING SOLVENT

Cyndan High Solve is a complex formulation of liquid hydrocarbons, specially formulated for degreasing. Oils and greases are quickly dissolved and removed from the cleaned surface. Cyndan High Solve can be used successfully by spray, dip or brush methods.

**DIRECTIONS:**

Apply liberal amounts to the surface to be cleaned and agitate to loosen stubborn accumulations. Cyndan High Solve may be used neat or diluted with any petroleum derived hydrocarbon liquid. However, a reduction in Cyndan High Solve's flash point and safety will result if diluted. Ideal for cleaning motors, small parts, heavy equipment and workshop floors.

**SAFETY:** Avoid contact with eyes.

**FIRST AID:** If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
