LIQUIDZYMES

A COMPLEX CULTURE OF NON BREEDING ENZYMES

FOR THE EFFECTIVE TREATMENT AND DEGRADATION OF WASTE WATER, BIO-ORGANIC CLEANING AND ODOUR CONTROL.
EFFECTIVE IN SALT AND FRESH WATER

Cyndan* Liquidzymes is a culture of Enzymes especially formulated and blended to provide broad spectrum treatment in all waste water situations. Ideal in aerobic and anaerobic conditions. This unique Australian developed and manufactured product meets all of Cyndan's* aims as it is safe to use, gives excellent results with true economy and is environmentally sound. The following recommendations are more effectively detailed if accurate data can be provided on your site. For this reason we recommend that each Cyndan* client complete a Cyndan* Waste Water Treatment Questionnaire. This can be obtained from your Cyndan representative.

DIRECTIONS:

ODOUR CONTROL: General applications - make up a solution of water and Liquidzymes at 20:1. Apply to the offensive area via appropriate spray equipment. Various dispensing systems are available for continuous applications. Please contact your Cyndan* representative.

GENERAL CLEANING: Cyndan's* Liquidzymes is effective for general equipment and floor wash downs at rates of 10:1 to 20:1. Add product to water and carry out normal cleaning duties. Rinse areas afterwards with fresh water. Ideal for tiles, concrete etc as Cyndan* Liquidzymes will penetrate up to 15cm of substrate and clean it.

NOTE: To treat leach drains is a matter of treating the source. I.E. the septic tank. Once the septic tank is operating correctly the Cyndan* Liquidzymes will clean and clear each leach drain restoring the capacity and operation to normal.

Marine Applications:

BILGE WATER: For treatment of bilge water contaminated with any fuel type in either salt or fresh water the following rates apply. Add 5mls for every 10 Litres of contaminated water. Renew the does every 7 days.

HEAD HOLDING TANKS: To control odour and to bioremediate head waste use Cyndan* Liquidzymes at a rate of, 10mls per 10 litres of holding tank capacity and renew the does every 7 days if the toilet is used frequently or as the ship is used.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
