

CYNDAN* **MARINE ACID WASH**

Cyndan Marine Acid Wash is an enhanced formula with Phosphorylated Ethoxylate for getting better results with less acid.

Triple Action

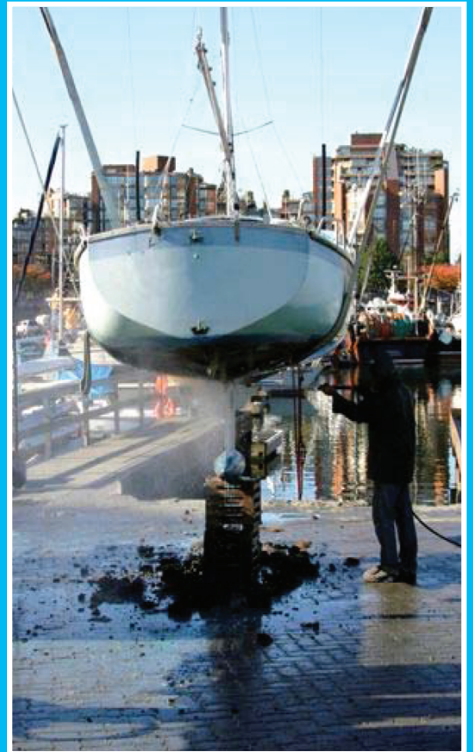

ACTION 1: Excellent for renewal of fibreglass which is faded or stained from rust, exhaust fumes, environmental contamination etc.

ACTION 2: Ideal for removal of slime from hulls, anti fouling and running gear.

ACTION 3: When used on anti fouling CYNDAN MARINE ACID WASH etches the previous anti fouling to provide a surface which binds to the new anti fouling thus ensuring a better adhesion and longer life.

For action 1: Dilute CYNDAN MARINE ACID WASH with up to 6 parts of water. Broom on to the hulls or decks. Allow to react for 2 – 3 minutes and rinse with high pressure water. For stubborn rust staining around metal fittings, detailing with a non scratching abrasive pad may be necessary.

For action 2 & 3: Apply at a diluted rate of 1 part CYNDAN MARINE ACID WASH with 10 parts water. Broom on, allow 2 – 3 minutes reaction time and rinse with high pressure water. A reapplication after all slime and foreign matter is removed is recommended to etch the surface prior to anti fouling.

Finish Off With Cyndan Stainless Steel Sentry

Cyndan Marine Acid Wash is a perfect companion product for Cyndan's Stainless Steel Sentry. Stainless Steel Sentry will provide a long term protection to all marine grade stainless, protecting it from unsightly Tea Staining and Rust. Ask your Cyndan Representative for a demonstration.
