

MICRO INVISIO SHIELD

Water Based

Invisible

Non Stick
Penetrating Sealer

Non Hazardous

Stain Resistant

Non Stick, Penetrating Sealer

Cyndan Micro Inviso Shield is a water & oil repelling, microscopic, invisible shield. It is not a surface or barrier coating, rather it deeply penetrates and chemically bonds with the substrate without altering it's appearance and allows the substrate to breathe.

Cyndan Micro Inviso Shield is waterbased, non-flammable, non-corrosive, non-hazardous. It improves slip resistance as aquaplaning is minimised. Micro Inviso Shield does not UV degrade and does not wear off in high traffic areas.

Cyndan Micro Inviso Shield can be applied to masonry substrates such as sandstone, pavers, exposed aggregate, brick, concrete and other natural stones to protect against water penetration, staining, chewing gum adhesion, efflorescence, corrosion of steel reinforcement, spalling and de-icing attack.

Using Micro Inviso Shield will help reduce your carbon footprint by minimising the need for maintenance cleaning.

Micro Inviso Shield was chosen as a finalist in the esteemed BIG 5, GAIA Awards in association with the Big 5 Trade Show Dubai, consisting of more than 3,200 exhibitors from 50 countries servicing the construction industry. The product was recognized for it's proven reduction in maintenance costs and subsequent reduction in greenhouse gas emissions.

Prevents:

- ✓ Staining
- ✓ Water penetration
- ✓ Efflorescence
- ✓ Concrete cancer
- ✓ chewing gum adhesion

on all masonry substrates
