# MOISTURE STRIPPER

PENETRATES, LUBRICATES AND DISPLACES MOISTURE

Cyndan Moisture Stripper prevents metals from corrosion, displaces moisture and lubricates moving parts. It also leaves residual coating that protects electrics from shorting.

## **DIRECTIONS:**

Do not swallow.

Spray rusted or heat bound parts liberally. Allow to stand for several minutes for maximum penetration.

Lubrication: Simply spray the dry or squeaky parts which require lubricating.

Moisture Control: Spray liberally onto water affected equipment (plugs, coil, distributor, wires, etc) to drive out moisture. The remaining film will protect against future water damage.

**SAFETY:** Avoid contact with eyes.

**FIRST AID:** If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
