MOWER RESTORER

250g/L SODIUM HYDROXIDE

UN 1760 HAZCHEM CODE 2R PACKAGING GROUP II

Great for cleaning metal, painted, rubber and plastic surfaces.

CYNDAN* MOWER RESTORER gives more life to your grounds keeping equipment. It is an extremely good release agent. It cleans metal, painted, rubber and plastic fittings on all equipment. It neutralises the corrosion causing acidic build-up on all grounds keeping equipment. It is a biodegradable formulation.

DIRECTIONS:

Dilute 1 part CYNDAN* MOWER RESTORER with 8 to 10 parts of water and apply to all soiled areas of equipment, e.g. blades, guards, tyres, hoses etc. Leave for 5 - 10 minutes and hose off with strong water pressure. In some cases where the build-up may have been encrusted over a long period of time, some agitation may be necessary. The use of the CYNDAN* 2.7 LTR FOAM APPLICATOR is ideal for this operation, as it will automatically apply the CYNDAN* MOWER RESTORER diluted with water. Please ask your CYNDAN* Representative for a demonstration.

Testing is advisable on some paint work. Due to the poor quality of some paints damage may occur.

SAFETY: Avoid contact with aluminium. Avoid contact with eyes and skin. Wear protective clothing, gloves and eye protection.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes. If skin contact occurs, remove contaminated clothing and rinse for 15 minutes with soap and water. Ensure clothing is washed thoroughly before using again.
