Consultants to the chemical and associated industries

February 8, 1999

Mr. Danny Hamilton  
Cyndan Chemicals  
P.O. Box 610  
Mona Vale, NSW 2103

Dear Mr. Hamilton:

## Biodegradability of Multimatte

We have investigated the ingredients of Multimatte to determine the biodegradability of this product. The results are discussed below.

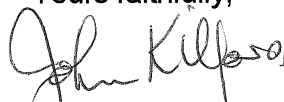

Multimatte contains organic and inorganic ingredients as indicated on the MSDS. The organic ingredients are biodegradable, and the inorganic ingredients are neutralisable.

We can advise that the product may therefore be described as biodegradable, and that this claim may be readily supported.

Further details may be seen on the MSDS if necessary.

We hope this information suffices for your purposes.

Yours faithfully,

John Kilford
