# MYKROGUARD

UN 1170	HAZCHEM CODE	2[Y]E	PACKAGING GROUP	II
---------	--------------	-------	-----------------	----

CYNDAN\* MYKROGUARD is used to treat glass, vitreous tiles and porous surfaces such as porcelain, marble, terrazzo and granite. CYNDAN\* MYKROGUARD is ideal for Architectural Glass, Large Buildings, Marinas, Clubs and Pubs, Casinos, Multistorey Apartment Blocks, Hotel Bathrooms, Commercial Kitchens, Shopfronts, Shopping Malls and Restaurants. CYNDAN\* MYKROGUARD Creates a chemically inert non-stick barrier. Repels water, oil and dirt. Protects substrate from chemical erosion and damage. Creates a barrier layer on porous materials. Maintains clarity of glass, gloss of tiles etc. Reduces frequency and difficulty of cleaning. Can be applied onsite - external or internal. Easy to maintain - no specific after-care requirements.

## DIRECTIONS:

CYNDAN\* MYKROGUARD is not a cleaner and therefore will only protect a substrate in the condition that it is treated. Approximate Coverage 50 sqm / Ltr.

Preclean the surface with a product like CYNDAN\* POWER KLEEN diluted with 9 parts water.

If the glass has been damaged buffing can be used to restore the surface. Ask your Cyndan\* Representative for more information.

CYNDAN\* CREAM CLEANSER can be used to remove surface scratching from glass. Once the glass is prepared and dried apply the CYNDAN\* MYKROGUARD as a fine mist spray and buff it into the glass until all the product disappears. Using a CYNDAN\* RECHARGABLE AEROSOL is recommended. See your Cyndan\* Representative for more information.

Allow 24 - 36 hours reaction and curing time. Your glass is now protected.

**SAFETY:** Avoid contact with eyes.

**FIRST AID:** If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
