ODOURLESS

ODOUR NEUTRALIZING COMPOUND

Cyndan Odourless while having a pleasant fragrance should not be considered a masking agent. Cyndan Odourless has been formulated to offer immediate and long term elimination of unacceptable odours by either destroying the odour or making it more acceptable.

Cyndan Odourless can be applied in any situation and may be diluted with varying amounts of water. Continual reapplication of Cyndan Odourless will provide a residual effect which will impede the reoccurrence of the original source of the odour.

Cyndan Odourless is a blend of a number of essential oils and various perfume compounds which are derived from plant materials mostly grown in Australia.

DIRECTIONS:

Cyndan Odourless may be applied through Cyndan's heavy duty spray applicator. As it will be distributed with water it will be diluted with 9 parts water. Spray Cyndan Odourless directly onto the offending surface or into the air sparingly. Add Cyndan Odourless to wash or rinse water at a rate of 1 litre of Cyndan Odourless to 60 litres water. Apply directly to the cleaned surface after solid or liquid waste has been removed.

For heavy areas Cyndan Odourless can quite safely be used in its neat form, however, it can be diluted with as much water as required and may be used through any spraying devices.

The area to be controlled should be covered with Cyndan Odourless by spray or mopped and left to dry in order to achieve the desired results.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
