OXY-SOAK

ALKALINE SALTS 20-24% w/w

Cyndan Oxy-Soak is a biodegradable stain soaker which whitens whites and hygienically sanitizes all soiled laundry. Oxygen boosted with sodium perborate for a white wash. Cyndan Oxy-Soak powder is also colour-safe.

DIRECTIONS:

Before soaking and cleaning of whites it is advisable to remove heavy soiling. Wet items can be placed directly into a solution of Cyndan Oxy-Soak powder. Add 30 grams of Cyndan Oxy-Soak powder to 7L of warm water. Solutions should be discarded every 24 hours in order to ensure that the sanitizing action is functional. Items should be soaked for a minimum of 2 hours after which they should be removed and rinsed by hand or through a washing machine and spun dry. For resistant stains soak overnight.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
