SOIL D

BIODEGRADABLE SOIL CONDITIONER AND WETTING AGENT

DIRECTIONS:

Dilute 1 part Cyndan Soil D with approximately 100-120 parts of water. 1L of this dilution will treat 350 square metres. For best results treat the area four times per year approximately every 3 months. For localized dry spots and heavily compacted areas a repeat application may be necessary.

To prevent dew formation use Cyndan Soil D diluted with 4 parts of water. Repeat this process when necessary.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
