

CYNDAN

SPECIALISED ACID WASH

**A POWERFUL COMBINATION OF ACIDS AND FLUORIDES
FOR EFFECTIVE CLEANING AND BRIGHTENING OF METALS
AND OXIDISED PAINTED SURFACES**

Cyndan* Specialised Acid Wash has been formulated to provide for the effective cleaning of all metals and oxidised painted surfaces. In addition to removing soiling of all types. Specialised Acid Wash brightens metals and painted surfaces that are tarnished from oxidisation, rust and welding burns.

• • • TRIPLE ACTION ACTIVES • • •

Three major components in Cyndan* Specialised Acid Wash provide a cross linking action covering all soiling types such as greases, oils, soots, soils, diesel fumes, oxidation and rust. Hydrogen Chloride with Ammonium Bifluoride provides accelerated, deep action, acidic cleansing, whilst Alkylbenzensulfonic Acid adds a soft wash detergent reactive cleanse. The acidic tolerant detergent allows for the removal of fatty type deposits in the food and janitorial industries. Specialised Acid Wash is also ideal in the building industry for all applications from new buildings to maintenance.
