

STAINLESS STEEL

Stainless Steel Rejuvenating Paste (part 1)

Stainless Steel Rejuvenating Paste is a preparation for the removal of corrosion and 'tea staining' on all grades of stainless steel whether internal or external. This non-abrasive formula not only cleans and removes the contaminants, it pre-conditions the stainless steel in preparation for the protective treatment of Stainless Steel Sentry. It is pH balanced in order to counter any acid corrosive residues remaining from previous cleaning products and contaminants thus preventing further 'tea staining'.

Stainless Steel Sentry (part 2)

Cyndan Stainless Steel Sentry is the second step to the rejuvenation and protection of your stainless steel. The Cyndan NANOLON concentrate, when applied to the rejuvenated stainless steel, microscopically coats it and protects it for several months against atmospheric corrosion which causes unsightly 'tea staining' and rusting. This product is designed to be used in conjunction with Cyndan Stainless Steel Rejuvenating Paste.

Stainless Steel Cleaner

Cyndan Stainless Steel Cleaner is a Heavy Duty cleaner specifically formulated to remove tea staining & corrosion common to stainless steel surfaces exposed to the elements. It chemically brightens the surface to a 'like new' state. Great for use on balustrading, commercial kitchens, tanks and any stainless steel surface. It is highly recommended that following the cleaning of the surface with Stainless Steel cleaner, you follow with an application of Stainless Steel Sentry to seal and protect the Stainless Steel from further corrosion.

Stainless Steel Polish

Cyndan Stainless Steel Polish contains a unique blend of ingredients for the total maintenance of all grades of polished stainless steel and aluminium. It removes watermarks, finger smudges and conceals surface scratches. Once applied it forms a protective monomolecular coating which repels water, soiling, chemical attack and adhesion. This protective coating preserves the surface against deterioration, enhances the appearance with a lasting gloss and eases future cleaning. Ideal for lift doors, fridges, automotive and marine fittings.
