# VITROGLAZE

The clear solution

Reduces cleaning time by up to 90%

*Prevents:*

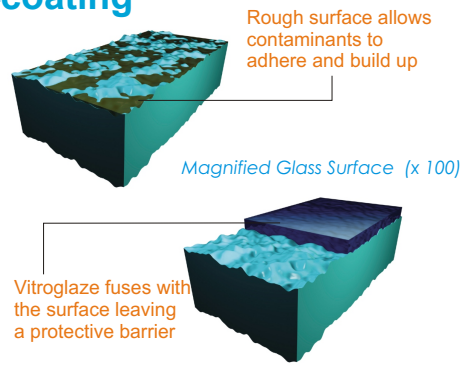
Etching & Deterioration

*caused by:*

Salt spray
Chlorine
Pollution
Hardwater deposits
Contaminants

## Non-stick, easy clean nano-coating

The seemingly smooth surface of glass consists of microscopic ridges and valleys which creates a favourable environment for the buildup of contaminants such as soap scum, hard water deposits and grime.



In time, the glass surface will visibly dull and become difficult to clean. This will result in high maintenance and premature replacement costs due to deterioration.

Vitroglaze is a permanent coating that prevents the adhesion and buildup of contaminants onto the glass surface. It also provides water and oil repellant properties.

Working similar to non-stick cookware, your glass become easier to clean, without the need for harsh chemicals. Vitroglaze saves valuable time and effort, guaranteed.

For use on:

- ✓ Glass buildings
- ✓ Marine glass
- ✓ Balustrading
- ✓ Showerscreens
- ✓ Tiles & vitreous surfaces

part of the **CYNDAN** Green Range

Suitable for use in food preparation areas.
