Consultants to the chemical and associated industries

February 8, 1999

Mr. Danny Hamilton  
Cyndan Chemicals  
P.O. Box 610  
Mona Vale, NSW 2103

Dear Mr. Hamilton:

## Biodegradability of Wondersolve

We have investigated the ingredients of Wondersolve to determine the biodegradability of this product. The results are discussed below.

Wondersolve contains a petroleum based hydrocarbon (which we believe meets the criteria), and surfactants claimed by the suppliers to be biodegradable.

We can advise that the product may therefore be described as biodegradable, and that this claim may be readily supported.

Further details may be seen on the MSDS if necessary.

We hope this information suffices for your purposes.

Yours faithfully,

John Kilford
